

OpenAIRE AMKE

- 52 members
- 36 countries

- Non-profit organisation, established Oct 2018
- Mission: Shift scholarly communication towards openness and transparency and facilitate innovative ways to communicate and monitor research
- A Scholarly Communication e-Infrastructure that brings together human capital and advanced ICT services
- A network of experts from major national organisations (National Open Access Desks) in operation since 2009

Global Collaborations: Latin America, US, Canada, Japan, China, ...

OPEN SCIENCE IN EUROPE: THE JOURNEY

- ✓ Institutional Repositories
- ✓ Preprints

- ✓ OA Journals
- ✓ Data Repositories

- OA Journals
- ✓ Thematic Preprints
- ✓ National Data Repositories
- ✓ Federated Infrastructures
- ✓ EOSC

- ✓ Innovative Publication Platforms
- ✓ Open Research Europe
- / Diamond OA
- ✓ HPC

OPEN SCIENCE

- Beyond Open Access to Publications
- Collaboration & Interdisciplinarity
- New functional and organisational schemes

https://www.unesco.org/en/natural-sciences/open-science

From a closed & traditional Scholarly Communication

To an Open Scholarly Communication ecosystem

that lowers barriers in research, increases dissemination of knowledge and discovery from researchers and society, makes research accessible on the web with no obstacles.

OWNERSHIP - WHO OWNS AND CONTROLS THE PROCESSES

TRANSITION TO AN OPEN COSTS FOR THE PROCESSES

TRANSITION TO AN OPEN COSTS FOR THE PROCESSES

Open Science

- OA Publications
- Open Peer Review
- Open Research Data
- FAIR Data
- Open Source Software
- Open Protocols
- •
- Collaboration beyond academia

Market forces: Different models or flavours

Not accompanied by services to make it easy for researchers

No incentives or rewards

Human Capacities & Upskilling

- Researchers are people who want to carry out their research. They are not super humans
- Need to recognise and commit to skill and involved different professional paths
 - Data Stewards
 - Data Librarians
 - Legal & Ethical specialists (Licensing, IP, privacy)
 - Research Software Engineers
 - Repository Managers
 - Content Curators
 - •

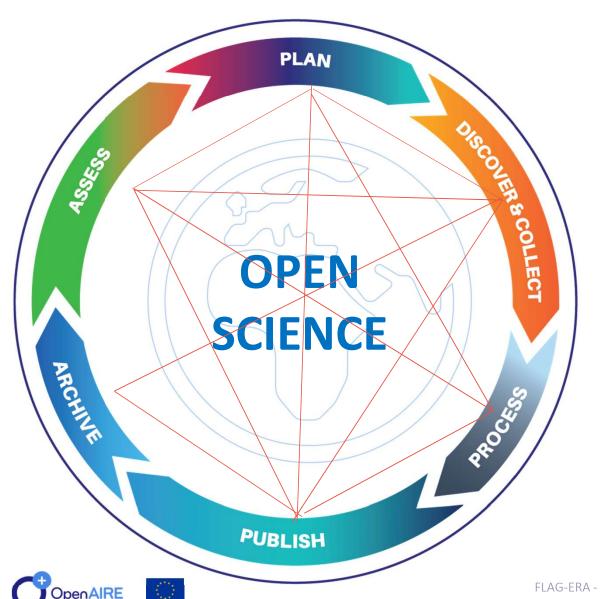

Integrated and concerted effort

Lifelong learning

Educate Policy Makers

Leadership programmes

NEW WAYS OF PERFORMING SCIENCE

- Everything is digital
- Everything is big
- Everything is connected

Research life cycle is interconnected, and openness has a positive affect in every stage

FLAG-ERA - 18 September 2024

OpenAIRE Services

http://catalogue.openaire.eu

DISCOVER

Services in our core

- Researchers discover, plan, anonymize, publish
- **Providers** interoperate, enrich metadata
- Research & Funding Performing organizations – track, assess, monitor research & open science
- Policy makers & public agencies assess
 R&I investments

AND STANDARD ODERALITY AND TO SERVICE OF STANDARD ODER STA

Building Infrastructure to **CONNECT** and **FEDERATE**

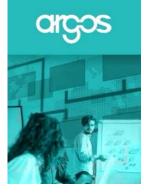

actors in the R&I http://catalogue.openaire.eu

The OpenAIRE Graph

Key Asset In Open Science Infrastructure

Inclusive, Transparent, Reproducible

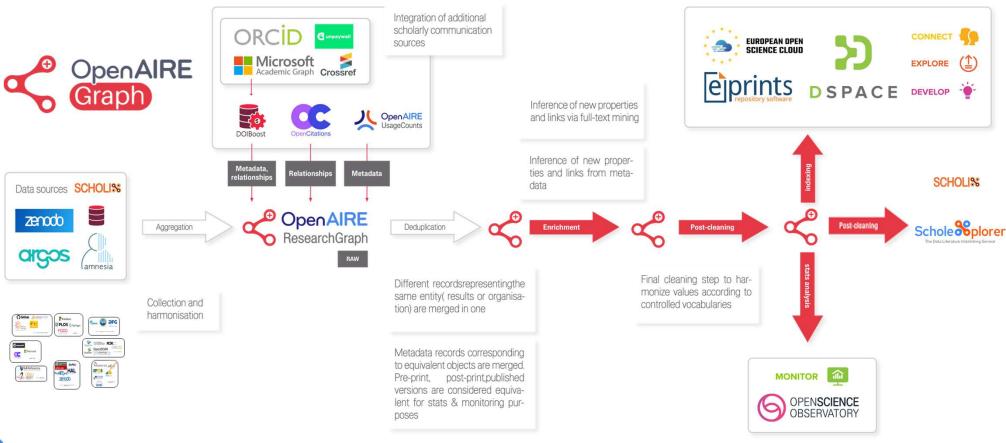

- Based on Open Science principles
- High relevance to the research community

A comprehensive and open dataset of research information covering 189m publications, 61m research data, 371k research software items, from 131k data sources, linked to 3m grants and 270k organizations.

All linked together through citations and semantics.

OPENAIRE GRAPH — KEY ASSET IN OPEN SCIENCE INFRASTRUCTURE INCLUSIVE, TRANSPARENT, REPRODUCIBLE

A KEY ASSET FOR EUROPE & THE WORLD

Where is it used?

Scientific Discovery

The Graph is used in the **OpenAIRE EXPLORE** service, enabling users to efficiently search and navigate through an interconnected research ecosystem.

Additionally, it serves as the primary resource supporting the exploration and recommendations in the **EOSC EU Node** (EOSC Portal).

Next Step: LLMs

Bibliometrics

Used for research evaluation in replacement of proprietary databases such as **Web of Science** or **Scopus**, with several benefits, including openness and transparency, embedded citation metrics and indicators, access to information beyond publications such as data and software, and the ability to easily integrate your own databases. Get a glimpse in **OpenAIRE MONITOR.**

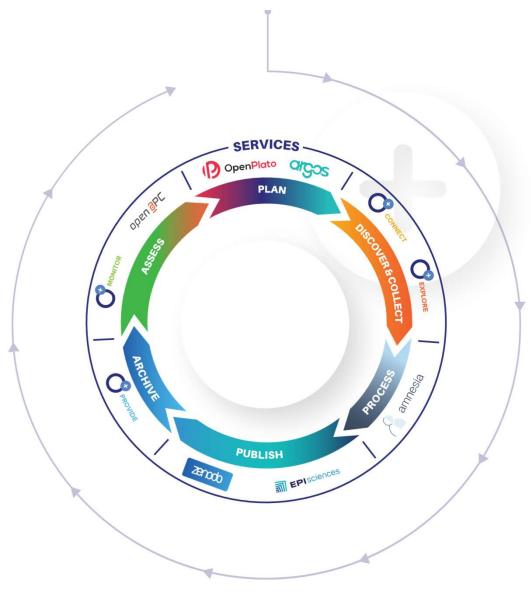

Open Science Monitoring

The Graph maintains data related to monitoring Open Access and Open Science policies. It is currently used in services such as the Open Science Observatory, the EOSC Observatory, and the Irish National OA Monitor. Also check OpenAIRE MONITOR to view out of the box indicators for organisations.

Ongoing: Country Monitors

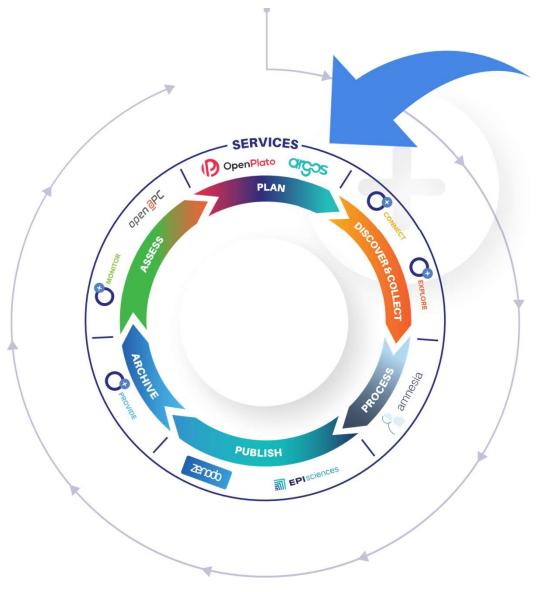

Ongoing : APIs

FOCUSING ON THE RESEARCH LIFECYCLE...

BEGIN WITH PLANNING DATA & SOFTWARE MANAGEMENT

Planning: Step up with data Create the Data Management Plan

- A way to support and track Open Science from the onset
- mandatory by research funders.
- Emerging as an integral part of the research ecosystem
- with lots of automations to make it easy for everyone to use.

- Use directly via Argos website argos.openaire.eu
- 2 Implement a local installation of Argos in your organisation (local premises)
- Request a white labelled installation of Argos, including personalised support and training.

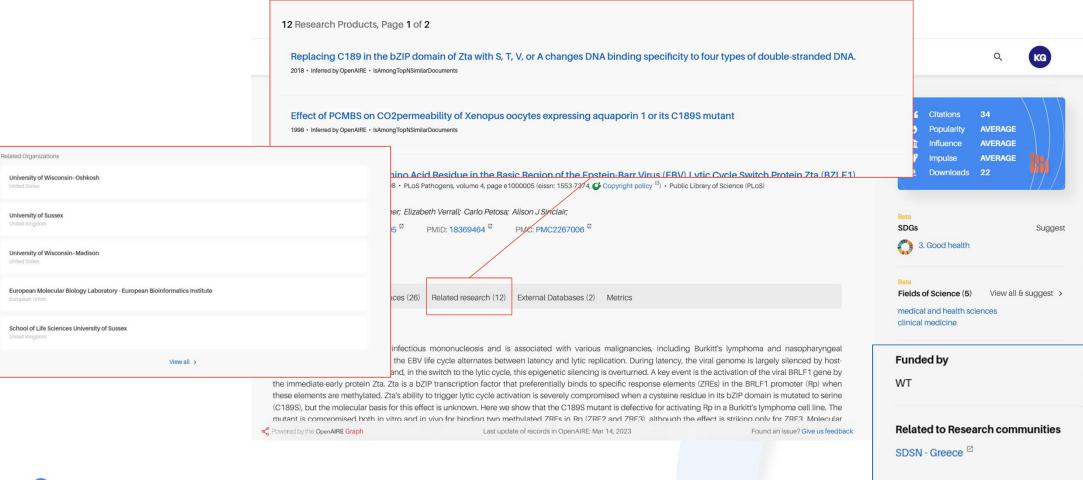

MORE than a search engine...

UNLOCK THE POTENTIAL FOR

COLLABORATION -

INTERNAL & EXTERNAL

Enhancing discovery with a customised search engine

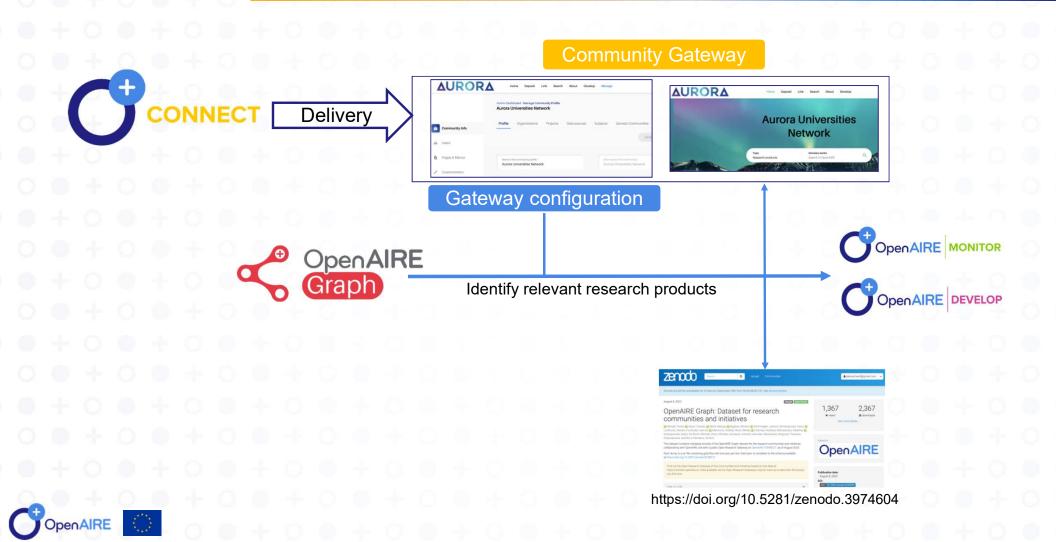

Create a **targeted gateway**, configurable to specific content based on

- repositories/journals of choice
- funding data
- enabled by automate selection process
- A secure place for communities to publish their results, in a guided manner, following OS practices
- Useful for University Alliances and Thematic
 Communities, to showcase their content under one branding
- Set up in less than one month

How Does CONNECT Work?

Community Gateway Content Configuration

Keywords

Discipline-specific subject terms to be found in the metadata

Projects From the 85 funders integrated in OpenAIRE

Data sources E.g. thematic repositories, archives and journals

Zenodo

With research products relevant for the field communities

Organisations Organisations in the field: we look for them in the affiliations

Advanced criteria

Combine criteria in AND or OR, like in an advanced search

Link

Link products in OpenAIRE, Crossref, Datacite, ORCID to the community, also in bulk **Propagation**

If a community result is supplemented by another research product, then the latter is also added in the community gateway

Full-text mining

Links to projects **Affiliations Document classification**

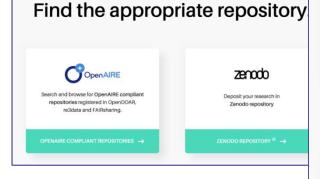

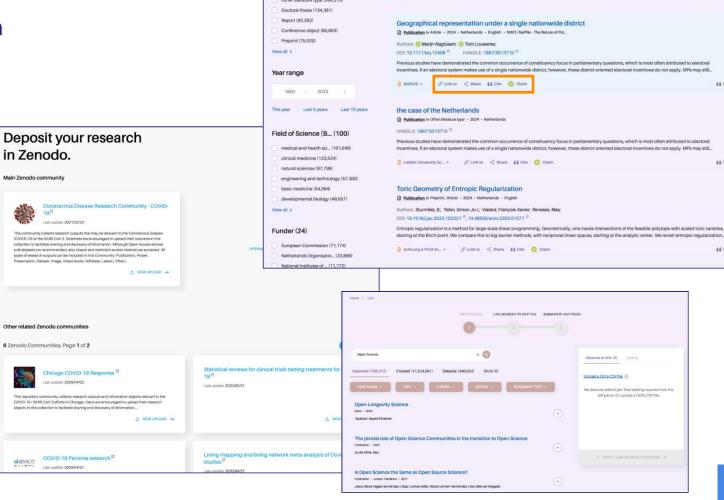

Facilitator of OS Practices

8 Statistica Sinica → P Link to < Share ££ Cite

Two time series of financial losses may be observed in different overlapping windows, serially dependent, heteroscedastic, and cross sectionally dependent. Fitting a regression model to each of the two time series, we construct an improved least squares estimator in one series exploiting the cross-sectional.

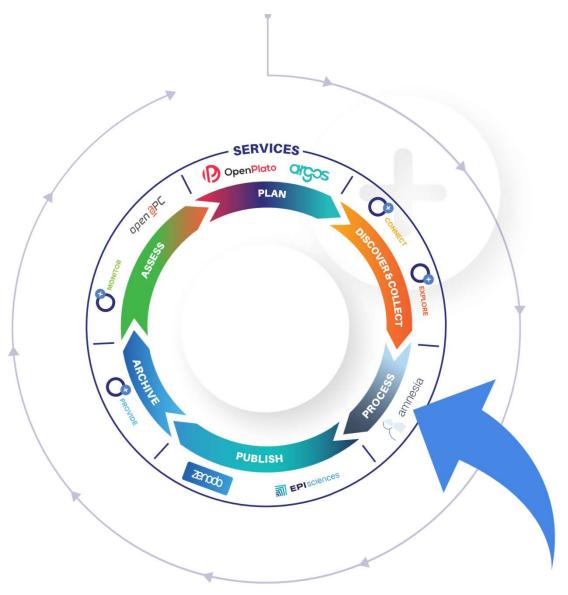

- Linking & claiming research
- Finding repositories
- Sharing research
- Open & FAIR metadata

Document Type (27)

MANAGE SENSITIVE DATA

This service is offered by Athena Research Center, Greece

Anonymise datasets

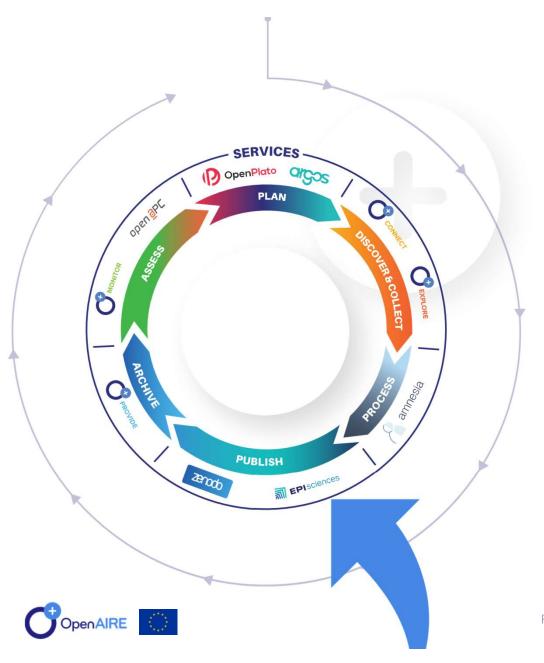

Ensure whatever your researchers publish abides to the rules about sensitive data, personal data, and GDPR guidelines, might prevent their process and analysis.

WHAT YOU GET

State of the art anonymization algorithms, with statistical guarantees that the output cannot be linked to the original data!

Packaged to be embedded in **workflows:** before publishing (last step before submitting to repository) or before sharing proprietary data.

CREATE OFF-THE-SHELF DIAMOND OA JOURNALS

This service is offered by CNRS, France

FLAG-ERA - 18 September 2024

Publishing for free: creating your Open Access Journal with EPIsciences

- EPIsciences, is an **overlay journal** web platform where researchers publish preprints on **diamond open access** journals for **free**.
- EPIsciences journals are operating on top of Open Access repositories e.g., HAL, arXiv, Zenodo
- Researchers submit preprints and a complete publishing system with reviewers, editorial workflow, board and sharing process initiates.

HOW EPIsciences WORKS

Step 01

Submission

An author submits the preprint in an open repository/overlay journal.

Step 02

Reviewing

The editorial board examines the submission, reviewers follow up for evaluation.

Feedback is sent back to author. When a final version is accepted, it is deposited on an open repository. Step 03

Publication

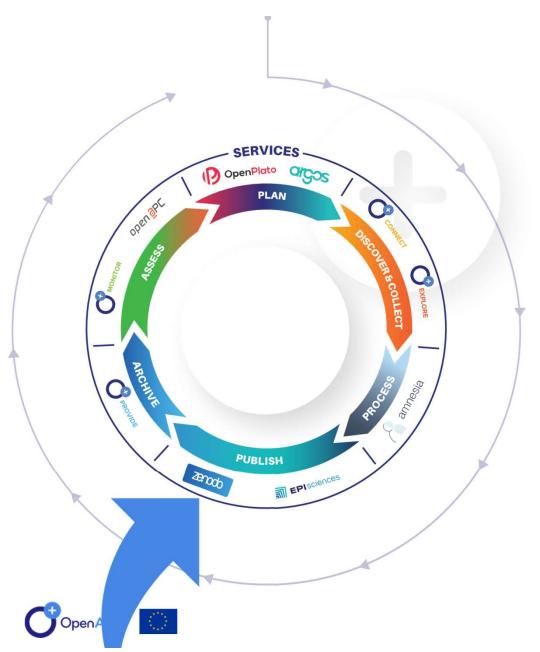

The article is published on journal's website and receives a DOI.

The article is harvested by OpenAIRE and is accessible on EXPLORE.

Discover more: https://www.episciences.org/

PUBLISH IN A TRUSTED ENVIRONMENT

WITH LATEST COMMUNITY STANDARDS

This service is offered by CERN, Switzerland

FLAG-ERA - 18 September 2024

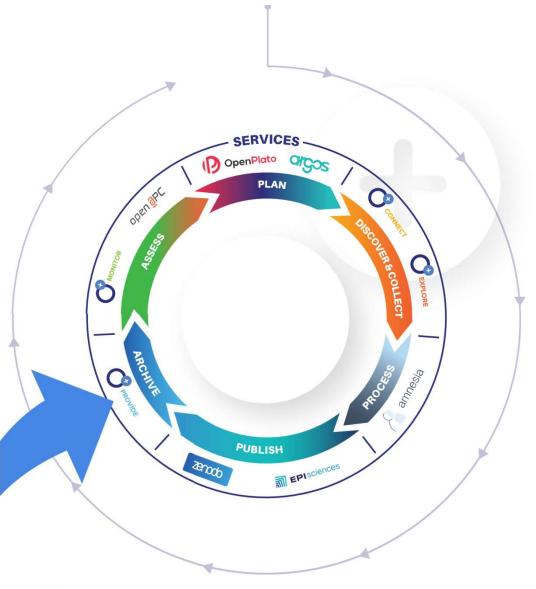

Publishing ... Not only manuscripts!

- A user-friendly way to share research objects in just a few clicks
- Get a DOI for citations
- Indexed at real time be OpenAIRE
- Direct links to Github to archive snapshots of code and assign DOI
- Institutional communities (also linked to Connect)

EXPOSE INSTITUTIONAL CONTENT TO EOSC AND THE WORLD IN A ONE-STOP-SHOP PLACE

More than Archive

- Make your repository accessible using Open, FAIR, and standard (meta)data
- Connect the research content to the OpenAIRE Graph and EOSC
- Get notifications on metadata updates
- Reveal hidden value of your research through OpenAIRE Services

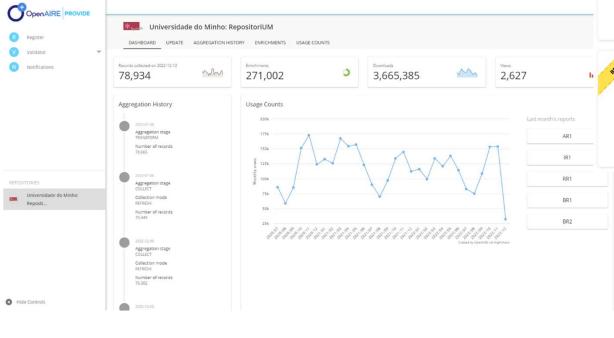

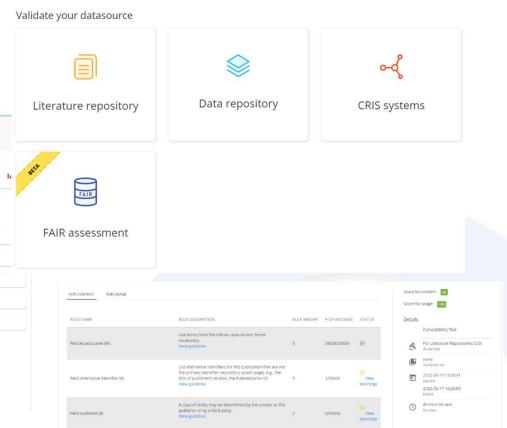

WHAT YOU GET

An admin dashboard to live view important information on your connected repository

Validator tool to test the compliance with OpenAIRE guidelines

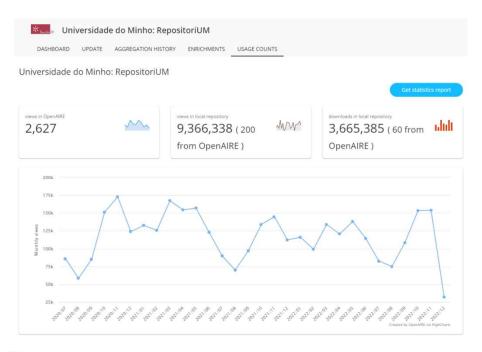

WHAT YOU GET

A customised portal for your repository manager, organisation, to:

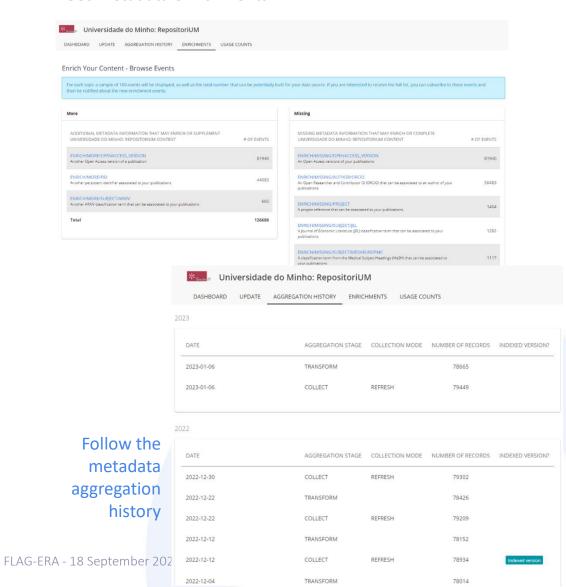

Get detailed usage statistics reports (using the COUNTER Code of practice directives)

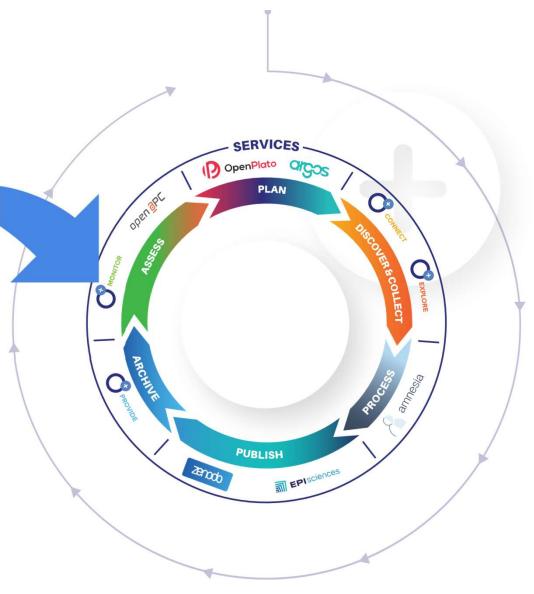

Get Metadata enrichments

ASSESS RESEARCH OUTPUTS AND OPEN SCIENCE POLICIES

Monitor research activities, outputs, collaborations, costs and impact

A customizable MONITOR dashboard, with numerous visualisations, by field of interest, research activity, etc. on your data, using research indicators

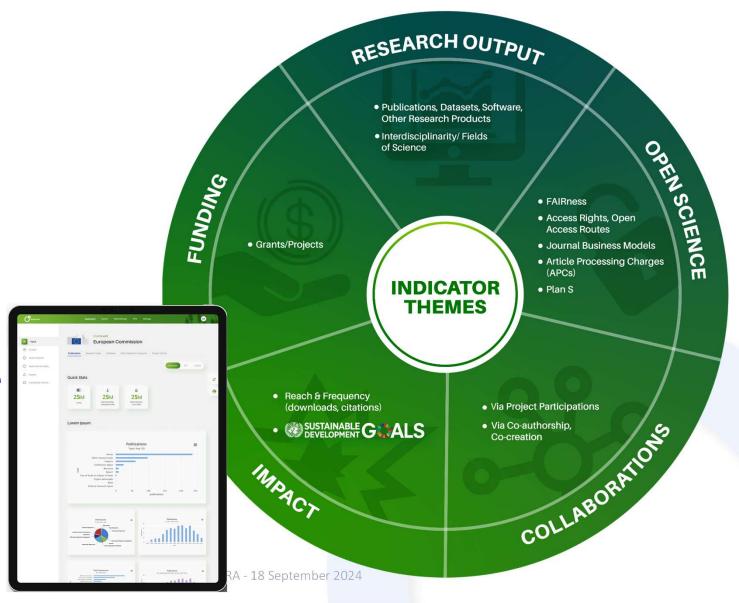

- Public indicators for external stakeholders Showcasing
- Restricted indicators for team-members Internal Monitoring
- Private indicators for "work in progress" Reviewing

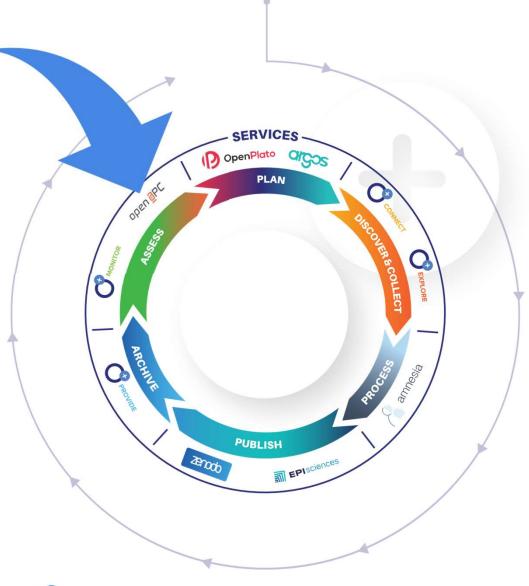

Linked to funding data, classifications (FOS, SDGs), FAIR metrics, etc.

Supported by AI analysis to get more insights.

KNOW & SHARE COSTS OF PUBLISHING KNOW YOUR INVESTMENTS

This service is offered by University of Bielefeld, Germany

Information on cost is power. Share with others

OA has many flavours and gold is one of them

Share your APC costs to a **global database** and get back useful statistics and insights about your transactions and about the others.

OpenAPC collects cost information on Open Access publishing for research academic institutions by providing in-depth analysis on cost trends across publishers, e-journals and books or monographs.

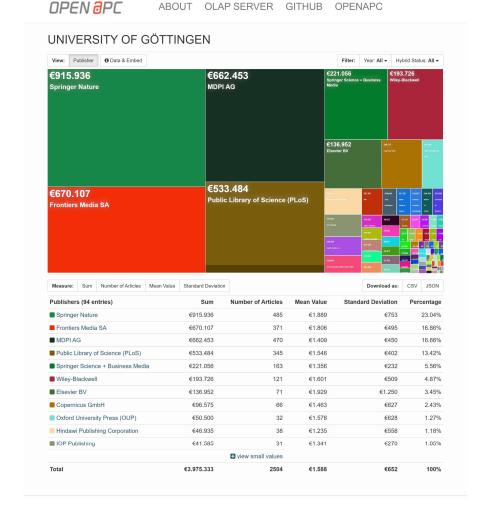

OpenAPC...

A **branded** website of your organisation, university

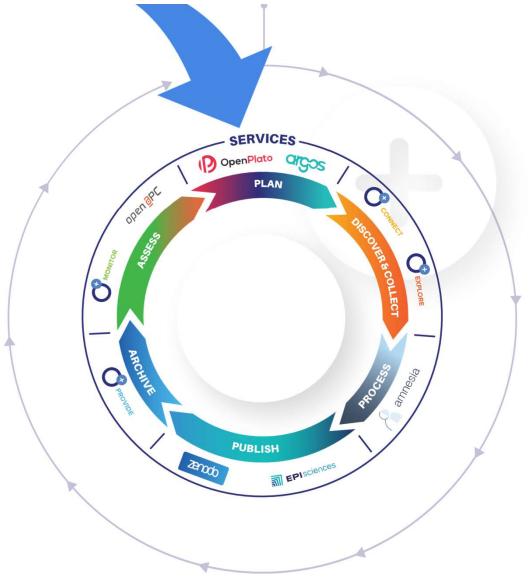

Comprehensive tree maps **graphics** with easy to view **information**: costs per publisher, with filters per year and publication status

Statistical values: No of publishers; Sum of money spent per publisher; Number of Articles; Mean value; Standard Deviation; Percentage

Download data as CSV, or JSON format or embed data on html pages

BUILD CAPACITIES VIA SKILLS

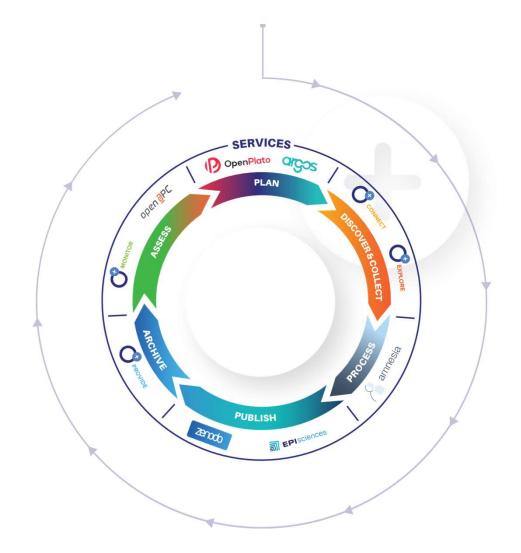

Train in Open Science Upskill your students and staff

- Guides, factsheet, tutorials, podcasts
- Helpdesk to respond to targeted questions
- OpenAIRE bootcamps: Train your staff with the experts
- OpenPlato Moodle platform: hosts community co-created and <u>authorised</u> open courses
